Group

## **SAVALLOS TRADING AND MANAGEMENT GROUP Ltd**

During its more than ten years of history, Savallos has developed strong business relations with producers of medical, rehabilitation and spa equipment and furniture from different countries.

We are ready to offer you all necessary equipment and services for unique spa projects, rehabilitation and healthcare facilities creation. We'll help to design, train the team and support at all steps of operation.

The equipment offered by us is installed and operated at many projects around the world, such as the rehabilitation centers, spa hotels, health and beauty centers, fitness clubs and much more.

One of the key products in our portfolio are baths, showers, float systems and others from German producer Trautwein GmbH.

*TRAUTWEIN*

A white sailboat with a tall mast is sailing on clear, turquoise water. In the background, there is a rocky island with green vegetation and another smaller sailboat. The sky is a deep blue with some light clouds. The overall scene is serene and tropical.

ThermoSpa

# ThermoSpa

SPA bed Thermo Spa gives you feeling of weightlessness -one of the most relaxing experiences you can experience. Dry floating gives you feeling of weightlessness - one of the most relaxing experiences you can get. You lie on 400 liters or 36-37 degrees warm water without getting wet.

Floating in an enclosed pod on top of the soft dry membrane, the body feels completely weightless, simulating zero-gravity. Just in 20 minutes into a float you lose all feeling in your body and transform into a floating consciousness without form. The mind loses all sense of time and space as your brain waves move into a theta state akin to those of a young child or someone in deep meditation.

Additional integrated options:

- External lighting AMBIENTE  
40 white LEDs integrated in the cladding.
- Wellness-module CONCERTO

For sound wave massage for the connection with an on-site audio-system. The corpus of the appliance itself is the resonating body, there is no need of additional loud-speakers. The played music can be felt and heard. The water transfers the vibrations through the film, in an unexpected intensity, directly to the person on the surface.

- Massage module AquaJet

The nearly weightless body gets a massage with 20 jets, controlled by an electronic distributor. The vibrating massage jets always start at the thighs, moving up to the shoulders in direction of the heart passing the 5 anatomic zones. The massage is repeated until the set time of treatment is over. The intensity of the treatment is influenced by the time of the massage in the individual zones. All the possible programs are menu driven and can be selected on the touch screen. With the emergency-stop key, the treatment can be stopped at any time.

- Colour light module – AURA . 8 integrated high-performance spots produce coloured lights that shine through the translucent film of the surface.

Hydroxeur

# Hydroxeur

Experience Trautwein philosophy in its purest form. The unique operating principle of our Hydroxeur® whirlpools means that the air is mixed into the water in a micro-fine way. The result of this champagne effect is not only a top class underwater massage, but also the therapeutic effect is unbeatable.

Hydroxeur bathtub can offer a wide variety of procedures. Whether for detox treatments, aroma or thalasso baths, due with special fittings for thermal, mineral and lake water.

The Hydroxeur is a real quick-change artist: from the design cladding in all colors of the Trautwein color palette to the variants shown here, our tubs adapt perfectly to the ambience in your bathroom. Numerous design options are available. The tub can also be integrated into the bathroom with ceramics.

# Hydroxeur 200

The Hydroxeur 200 bathtub represents a new and unique offering for a demanding clientele in hotels, SPA centers and beauty clinics.

The Hydroxeur 200 offers all the benefits of a luxurious bathtub in an aesthetic design, equipped with modern and reliable technology.

Using of medical technologies which developed by Trautwein avoids the growth of bacteria in the air supply and heating system, as happens in conventional jacuzzies. A built-in automatic flushing system is provided for flushing the entire channel system and is carried out after each drain of the bath.

As a result, the smallest air bubbles are added to the water, and the temperature of the water circulating in the bath remains constant without additional heating. The elimination of the air heating system makes Trautwein's hydromassage bathtubs the most hygienic and safest.

The bathtub can be equipped with up to 290 hydromassage jets, 60 air massage jets, LED lighting, filling control, automatic draining and user-friendly control system with waterproof touch screen or Bluetooth tablet. All these features make bathing a real pleasure.

# Worishofen

Balneological bathtub Worishofen 1800 AC are able to turn procedures into a real pleasure, filling the air with the aromas of mountain herbs and exotic oils, saturating the body with Dead Sea mud minerals. The unique underwater massage system, consisting of 8 anatomically located jets that create "whirlpool baths" and a shower-massage hose with the possibility of aeration, promotes deep penetration of therapeutic elements, maximum relaxation and muscle development.

Thanks to the seamless acrylic glass technology, the bathtubs are easy to clean and do not suffer from the influence of balneological solutions. Outside, the frame is reinforced with special fiberglass, which completes the laconic design of the bath.

WARM SAND  
SANTORINI

Vulkanosand

Psammotherapy on the couch with volcanic sand is a unique possibility to relax and fully plunge into the atmosphere of a sea resort

# Vulkanosand

The relaxing properties of warm sand have been known for a long time.

In the Mediterranean region, bathing in warm sand was used to ease muscular pain, spinal pain and rheumatism, and also for general improvement of wellbeing.

Vulkanosand, a couch with volcanic sand, is ideal for psammotherapy [treatment with hot sand), different kinds of massage and Ayurvedic procedures.

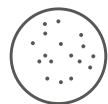

Comfortable and well thought-of construction of the couch allows to fully relax and get charged with vital power during the procedures. The sand mix prepared on the basis of patented technology is soft and amenable to the shape of the body. Thanks to its structure and composition it has an especially high coefficient of heat transfer. The soft influence of heat relaxes the muscles, and the person has the feeling of pleasant warmth and calm during the procedure.

## **WHEN THINGS IN YOUR LIFE ARE IDEAL, YOU USE THE PRODUCTS OF TRAUTWEIN**

Trautwein GmbH has been producing high-grade equipment for SPA and Wellness centers around the globe. The company exist since 1929 and to this day remains under the control of family business owners who are directly involved in all production processes.

Company uses only components from local manufacturers for the production of its products, moreover from neighboring villages, thereby providing jobs and helping the economy of south-west region. Maintaining the aesthetics and premium appearance of bathtubs, the manufacturer uses Grohe fittings.

Trautwein is an environmentally friendly company, using solar panels for production, which are installed throughout the plant. In addition, the surplus generated by the solar panels is used to power the Emedingen suburb.

Product line has a wide range for both wellness and medicine. As Trautwein manufactures medical products, they incorporate medical technology into their wellness and spa products to ensure their safety and functionality. For example, the hot tubs are equipped with a medical disinfection system. Just add a disinfectant and press a button to clean all the channels and nozzles, which distinguishes Trautwein baths from others.

All bathtubs are produced by medical acryl of their own production and are formed by a seamless method. Therefore, the surface of the baths has no joints, which allows Trautwein's users to maintain aesthetics and ensure comfort and safety.

Each product combines intellectual ideas and technical perfection. Stunning design solutions for your SPA center, different materials, high functionality and easy handling open endless possibilities.

Relax and forget your problems, while Trautwein products will take care of your wellbeing.

## **DESIGN, QUALITY AND DURABILITY**

Trautwein take care of durability, reliability and comfort of products. Bathtubs and couches are made only of premium acryl, the contact surface is always smooth, pleasant to touch and easy to wash. The varnish coat of decorative panels of Trautwein products is intended to last for decades.

The finishing of bathtubs, tables and couches is made with premium materials, such as walnut, bamboo and zebrano wood, natural granite, Alcantara suede. Also, couches and bathtubs can be decorated with artificial leather or easy to touch ceramic panels.

All bathtubs are equipped with premium Hansgrohe plumbing fixtures [Germany]. Cascading filtering system is used in the system of nozzles and water channels to ensure water cleanliness and softness. An integrated thermostat precisely keeps the necessary temperature. Double limitation and protection systems are provided to ensure safety. Special disinfection programs allow to save the client's and user's time.

Control systems are ergonomic, intuitive and easy to use. Advanced electronics allows to precisely set the required parameters, select wellness programs, including setting harmonious balance of heat, parameters of water or contactless massage, audio, magnetic and chromotherapy.

Passion and perfection in everything.  
Impeccable details and elegant forms accentuate hypnotic luxury and  
form the space of unique design and absolute relaxation.

## **We are focused on your wellbeing in all manifestations**

The products of Trautwein are selected by the most experienced and demanding clients: deluxe hotels and cruise liners, premium SPA centers and balneology resorts in 85 countries of the world.

Over 10 000 satisfied customers all over the world can confirm our expertise and ability to satisfy exclusive demands for design and functionality.
