

THERMO SPA - UNIC SOLUTION FOR RECHARGE ROOM

RECHARGE ROOM

The concept of a Recharge Room, or "Restoration Room," is a specially equipped space in the office designed for the rest and recovery of employees.

Modern companies, aiming to stand out in the job market, create unique projects focused on increasing loyalty and retaining employees by establishing additional spaces within offices to reduce stress, restore energy, and improve employees' moods.

The Recharge Room has several advantages that contribute to creating a more comfortable and productive work environment, which increases employee efficiency.

THERMO SPA

Thermo SPA is a device for contactless hydromassage, dry floating, and thermotherapy. An innovative solution for use in the Recharge Room concept.

Floating: 100% sensation of weightlessness, which can only be experienced while lying on the surface of the Dead Sea. The possibility of maximum relaxation.

Compactness and easy of installation. Only plug is needed for connection.

The heated surface relaxes the body, which is perfect for sleeping.

**No contact with water
You can stay in your clothes.**

BENEFITS OF THERMO SPA

EASE OF OPERATION

An intuitive control panel with preset programs simplifies use and saves time. No additional staff is required.

MULTIFUNCTIONALITY

The ability to customize temperature, hydromassage, lighting, and music according to the user's preferences and needs.

MINIMAL MAINTENANCE

The presence of automatic systems for monitoring and maintaining water level and temperature reduces the need for constant user supervision. Annual scheduled maintenance is sufficient to keep the device operational.

ENERGY EFFICIENCY

The use of energy-efficient technologies reduces environmental impact.

SAFETY AND COMFORT

Built-in safety systems prevent overheating and ensure the reliable operation of the device.

TECHNICAL SUPPORT

The availability of service and support in Cyprus ensures long-term and uninterrupted operation of the device.

STANDARD CONFIGURATION AND TECHNICAL SPECIFICATIONS

- Floating - included in the standard configuration
- Dimensions, mm: 2440x1090x620
- Height adjustment, mm: 620 - 850
- 40 white LEDs integrated into the cladding
- Weight without water/with water, kg: 230/580
- Electrical connection: 50 Hz, 2500 W
- Connection - 230 V socket only
- Heated surface maintaining a constant temperature up to 37 degrees Celsius
- The installation body can be made of acrylic in any RAL color, as well as wood or bamboo
- No water connection required, the bath is filled upon commissioning
- Technical maintenance once a year
- Service center in Cyprus
- Availability in stock in Cyprus

ADDITIONAL MODULES

THERMO SPA

SOUND MODULE CONCERTO

Music soothes the ears and sound waves massage the body. The module is equipped with Bluetooth to enjoy your favorite tunes.

HYDROMASSAGE MODULE AQUAJET

Replaces a massage therapist. Five massage zones with adjustable intensity. Water jets massage the body from neck to hips through a thin membrane, relieving tension.

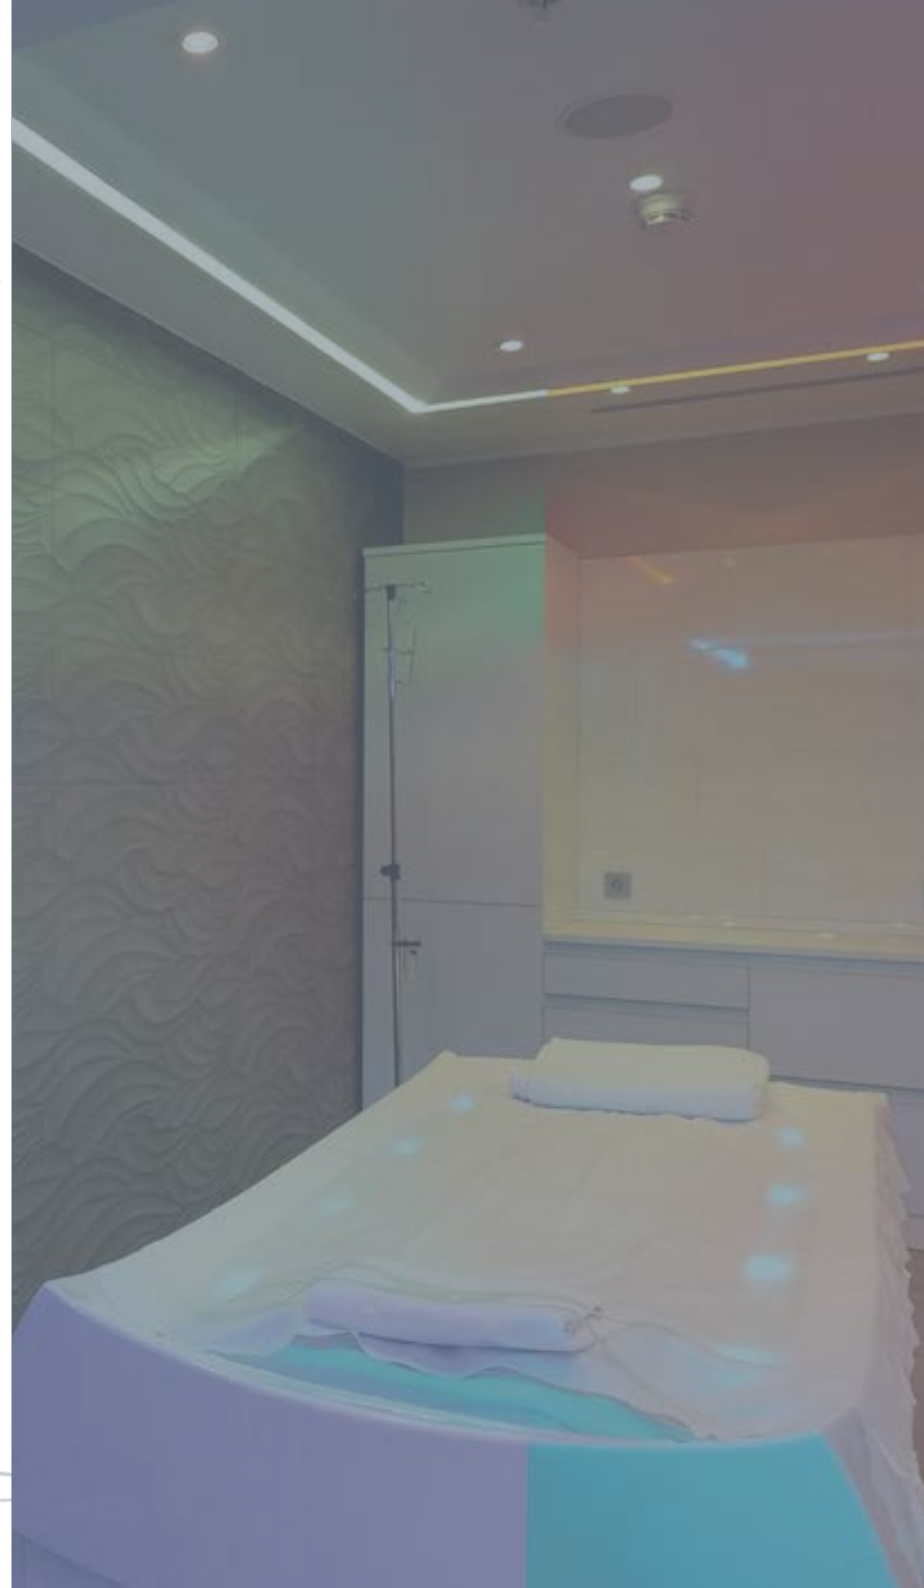

COLOR MODULE OF CHROMOTHERAPY AURA

Built-in lighting allows you to choose your favorite color or automatically change it during the procedure. The soft lighting helps restore the nervous system.

MASSAGE MODULE

The 3-section massage bed transforms into a full-fledged massage table.

AREAS OF USE

The manufacturer of the unit is the German company Trautwein GmbH, founded in 1928, specializing in systems for health improvement and treatment, guaranteeing high quality and safety.

Thermo SPA allows you to use the healing properties of water to maintain a person's physical and mental health, for the harmony of body, mind and soul.

Thermo SPA has been used for many years in various areas: in hotels and spa salons, rehabilitation centers, fitness centers, at home and even in airports to quickly restore strength between flights.

These advantages make Thermo SPA an ideal choice for use in the Recharge Room concept, providing comfort and user satisfaction!
